

Attachment "C"
(Marked-Up Copy of Amended Claim)

1. (Amended) An optical fibre connector comprising a housing and an internal core member defining a channel means for receiving an optical fibre, a chamber [for receiving a quantity of curable adhesive being] in communication with the channel means, the connector including plunger means to reduce the volume of the chamber, whereby a quantity of spreadable, curable adhesive contained in the chamber [in use] is urged around an optical fibre disposed in the channel by said plunger means before the adhesive cures.
